**Legend**

- Allocated Development Sites
- Borough Boundary
- Main River
- Culverted Main River
- Ordinary Watercourse
- Culverted Ordinary Watercourse
- Flood Zone 3 with a 70% allowance for climate change
- Risk of flooding from Rivers**
- Flood Zone 3B
- Flood Zone 3
- Flood Zone 2
- Risk of flooding from Surface Water**
- High risk of flooding (3.3% AEP)
- Medium Risk of flooding (1% AEP)
- Low risk of flooding (0.1% AEP)
- Risk of flooding from groundwater**
- Limited potential for groundwater flooding to occur
- Potential for groundwater flooding of property situated below ground level
- Potential for groundwater flooding to occur at surface
- Suitability for infiltration SuDS**
- Highly compatible for infiltration SuDS
- Opportunities for bespoke infiltration SuDS
- Probably compatible for infiltration SuDS
- Very significant constraints are indicated
- Flood Risk from Reservoirs**
- Reservoir flood extents

RISK OF FLOODING FROM RESERVOIRS

SITE LAYOUT

SITE NAME: Banbury House	SITE LOCATION: Bushell Way, Chislehurst	SITE AREA: 2949 sq.metres																	
<b>FLUVIAL (RIVERS)</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th> <th>% OF SITE</th> <th>AREA (sq.m)</th> </tr> </thead> <tbody> <tr> <td>FLOOD ZONE 2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> <tr> <td>FLOOD ZONE 3A</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> <tr> <td>FLOOD ZONE 3B</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> </tr> </tbody> </table>			% OF SITE	AREA (sq.m)	FLOOD ZONE 2	0	0	FLOOD ZONE 3A	0	0	FLOOD ZONE 3B	0	0					
		% OF SITE	AREA (sq.m)																
	FLOOD ZONE 2	0	0																
	FLOOD ZONE 3A	0	0																
FLOOD ZONE 3B	0	0																	
<p><b>SUMMARY:</b> The whole of the site is located within Flood Zone 1. In agreement with this, no recorded incidents of river flooding in this location are held by the Environment Agency.</p>																			
<b>SURFACE WATER</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th> <th>% OF SITE</th> <th>AREA (sq.m)</th> <th>MAX ANTICIPATED DEPTH</th> </tr> </thead> <tbody> <tr> <td>HIGH RISK OF FLOODING:</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0m</td> </tr> <tr> <td>MEDIUM RISK OF FLOODING:</td> <td style="text-align: center;">5</td> <td style="text-align: center;">147</td> <td style="text-align: center;">0.6m</td> </tr> <tr> <td>LOW RISK OF FLOODING:</td> <td style="text-align: center;">10</td> <td style="text-align: center;">295</td> <td style="text-align: center;">0.6m</td> </tr> </tbody> </table>				% OF SITE	AREA (sq.m)	MAX ANTICIPATED DEPTH	HIGH RISK OF FLOODING:	0	0	0m	MEDIUM RISK OF FLOODING:	5	147	0.6m	LOW RISK OF FLOODING:	10	295	0.6m
		% OF SITE	AREA (sq.m)	MAX ANTICIPATED DEPTH															
	HIGH RISK OF FLOODING:	0	0	0m															
	MEDIUM RISK OF FLOODING:	5	147	0.6m															
LOW RISK OF FLOODING:	10	295	0.6m																
<p><b>SUMMARY:</b> Parts of the site are shown to be at 'Low' and 'Medium' risk of flooding from surface water, with a maximum anticipated depth of approximately 0.6m. Mitigation measures will be required to reduce or manage the risk of surface water flooding to the proposed development; consideration should be given to the impact of those measures on the risk of flooding in the surrounding area.</p> <p>Subject to ground conditions, the site is suitable for bespoke infiltration SuDS and in the vicinity of a surface water sewer. The proposed development drainage should therefore use the full SuDS hierarchy as specified by Policy 5.13 of the London Plan.</p>																			
<b>GROUNDWATER</b>	<p><b>SUMMARY:</b> The London Borough of Bromley does not hold any records of Groundwater flooding affecting the site. This is in agreement with the British Geological Survey groundwater mapping which indicates that groundwater flooding is unlikely to occur in this location.</p>																		
<b>SEWERS</b>	<p><b>SUMMARY:</b> There is a surface water sewer approximately 3 metres from the site boundary, the residual risk of flooding from the sewer as a result of blockage should be considered by a site specific Flood Risk Assessment (FRA). Thames Water should be consulted as part of the FRA to determine the capacity of this and any other sewers in the vicinity and their likelihood of surcharging.</p>																		
<b>ARTIFICIAL</b>	<p><b>SUMMARY:</b> The site is not in an area indicated to be at risk of flooding as a result of a reservoir breach.</p>																		
<b>SITE SUMMARY</b>	<p><b>SITE ALLOCATION:</b> The 'Banbury House' site has been allocated for Residential use and is therefore classified as 'More Vulnerable' in accordance with Table 2 of the Planning Practice Guidance to the National Planning Policy Framework.</p> <p><b>PLANNING IMPLICATION:</b> There are no Main Rivers or Ordinary Watercourses within 500m of the allocated development site. The site is entirely located within Flood Zone 1 and is therefore an appropriate location for all development types, including Residential.</p>
