

of the emergency services, the health system and London's transport infrastructure.

- 1.6.7 Good planning can make London more resilient against the threats of the modern world, while improving the city's impact on the environment. The approaches set out in this Plan will ensure that London remains a safe and prosperous place to live for many decades to come.

GG6 Increasing efficiency and resilience

To help London become a more efficient and resilient city, those involved in planning and development must:

- A seek to improve energy efficiency and support the move towards a low carbon circular economy, contributing towards London becoming a zero-carbon city by 2050
- B ensure buildings and infrastructure are designed to adapt to a changing climate, making efficient use of water, reducing impacts from natural hazards like flooding and heatwaves, while mitigating and avoiding contributing to the urban heat island effect
- C create a safe and secure environment which is resilient the impact of emergencies including fire and terrorism
- D take an integrated and smart approach to the delivery of strategic and local infrastructure by ensuring that public, private, community and voluntary sectors plan and work together.
