

Development Density

Assuming 60% of the potential sites (13257 SQM) are developable (8145 SQM)
 Gives 100 units per typical floor

- Key:
- Site (10,772 SQM)
 - Bromley Allocation Boundary (45,593 SQM)
 - Sites of Potential Development (13,257 SQM)
 - 60% of developable sites (8145 SQM)

TO ACHIEVE GOAL OF 1000 UNITS = 10 STORYS NEEDED PER SITE.
