

The council are flagrantly inept and obstructive to a solution as you know from the right of way issue and you can see from a lack of emails from them recently, they have no interest in this matter. They are in this email chain but still do not communicate with us, despite the severity of what is happening here.

My 999 call from the weekend ended with the call handler telling me that I had exhausted every avenue of action, just to keep calling 999. The fences at your site are appalling and leave us wide open to this problem. Please advise your plan of action to a very worried community. I know that you sympathise - which is more than Bromley Council have offered us in the last few months (!) but we need action not words. We are told it is a matter that is hard to solve, but seems an excuse to not get moving forward on it.

I will happily meet with you and other residents if they will join me, perhaps on a Sunday at 1pm so you can see the thugs in action to discuss proposals. I presume you are working on signs requested and some security measures. Please let me know how this is progressing.

Regards,
